ST. CHARLES COUNTY WELL FIELD

MONITORING PROJECT

GRANT NO. DE-FG05-89OR21864

SUPERSEDED

Prepared by: Stanley Remington
July August and September 1997

MONTHLY REPORT

JULY 1997

BY

Stanley Remington

Consulting Hydrologist

I. CHEMICAL ANALYSES

The results of testing wells RMW-2 and PW-9 have been received and are appended. These wells were sampled on June 16, 1997. They were the quarterly samples which I take with the Department of Energy. They include some chemical parameters for which normally I do not test. The metals and inorganics all show normal values. Well RMW-2, an observation well, showed an arsenic content of 67.9 ug/L. It has been noted that the arsenic content of this well has been fairly persistent over the last several months. There is no obvious reason for this. However the total content is not over the NPDES limit. On the other hand no arsenic was noted in well PW-9, the nearest pumping well from RMW-2. The Department of Energy has also picked up the arsenic in about the same quantity as my analysis. Well PW-8 was sampled by me on July 28, 1997. The results have not yet been received.

II. FUTURE PLANS

I will test well PW-2 in the latter part of August. Now that my surgery has been completed I should be able to resume a more normal schedule. I will continue analyzing any and all reports received by me and will continue to sample wells and treated waters whenever these are required.

III. MISCELLANEOUS

Appended is the St. Charles County Water Department Water Sales Report for June 1997.

Very little was done by me during July 1997 since as stated above I was in the hospital from July 3 to July 24, 1997. Fortunately my recovery is going well and I do not anticipate any more physical problems in the near future.

RE: ATAS #19234.01-#19234.02
Weldon Spring

Dear Mr. Remington:

Enclosed are the analytical reports for the samples received in our laboratory on June 16, 1997.

If, in your review, you should have any questions or require additional information, please call Ruseal Brewer, Assistant Project Manager, or me at (314) 434-4570.

Thank you for choosing ATAS for your analytical needs.

Sincerely,

Richard Mannz
Richard H. Mannz

MONTHLY REPORT

AUGUST 1997

BY

Stanley Remington

Consulting Hydrologist

I. CHEMICAL ANALYSIS

The results from well samples taken on July 28, 1997 from well PW-8 have been received and are appended. All of the results are well within the NPDES limits and are within historical ranges. Gross alpha, gross beta, total uranium and nitroaromatics were tested.

Well PW-2 was tested on August 18, 1997 but the results have not yet been received.

II. REPORTS

The second quarterly report for April, May and June 1997 was received from the Department of Energy. No abnormal readings were shown on any of our pumping wells or at the water treatment plant at Weldon Spring.

III. FUTURE PLANS

I will sample with the Department of Energy the quarterly sampling during September 1997. I will sample RMW-2 and PW-9. Also I will review any reports submitted to me from various agencies in the state.

IV. MISCELLANEOUS

The results from the St. Louis County Department of Health analyses of the gross alpha and gross beta, taken at the water treatment plant at Weldon Spring both for raw and treated water are appended. Both results are well within NPDES ranges.

The monthly water sales report is appended for July 1997. A large increase in sales was noted because of the lack of rainfall during July.

RE: Sample Analysis
St. Charles County Water Plant

Dear Stanley,

Enclosed for your review and report, please find laboratory test results for gross alpha and gross beta for the raw and finished water taken at the Water Plant for the period 5/1/97 to 5/31/97 and 6/1/97 to 6/30/97.

Please advise if you have any comments.

Sincerely,

Joe R. Nichols
County Engineer

MONTHLY REPORT

SEPTEMBER 1997

BY

Stanley Remington

Consulting Hydrologist

I. CHEMICAL ANALYSIS

The treated sample from the quarry batch number 50 was analyzed on September 11, 1997. The results are appended. The results showed that all hazardous chemicals were removed in the processing of the quarry water. The batch was later discharged into the Missouri River.

On August 18, 1997 well PW-2 was tested for radioactive parameters and nitroaromatics, shown as explosives. The results show that no explosives were present and the radioactive elements were all well below NPDES limits. The results are appended.

On September 18, 1997 I sampled wells RMW-2 and PW-8 with the Department of Energy. These were the quarterly samples which included chemical parameters not sampled during my monthly sampling. These results have not yet been received.

II. FUTURE PLANS

I will sample RMW-3 around the middle of October 1997. The annual St. Louis Regional Environmental Conference is being held on October 23, 1997 at the Adam's Mark Hotel in St. Louis. I intend to go to this conference in the so-called "Water Breakout". This means environmental problems in surface and ground water will be discussed.

III. MISCELLANEOUS

Enclosed is the St. Charles Water Department Monthly Water Sales Report for the month of August 1997. Also enclosed is the Sample Analysis Request from the

St. Charles Water Department to the St. Louis County Department of Health for the analyses of radioactive parameters for the raw and finished waters at the water treatment plant at Weldon Spring. Results of the analyses showed that these parameters were well within NPDES limits.
